

# An unsurpassed service - sourcing and providing spares or replacement parts for BS&B's process equipment...

BS&B designs, builds and commissions equipment, systems and plants for the world's oil, gas, chemical and refining industries. The Company's expertise includes Separation, Gas and Liquid Dehydration, Gas and Liquids Recovery, Amine Desulfurizing and Sweetening Units and Heaters for the oil and gas industry. BS&B markets its products and services through offices in Houston and Edmonton.

The expertise is supported by a specialist services department offering spares or replacement parts for all our process equipment lines.
